### G. A. Manhard Improves Rapidly.

G. A. Manhard has continued to improve during the week and it is now felt he is out of any real danger. Considering the nature of the accident his friends are naturally greatly pleased to know that no permanent injury is likely to result.

### School Pupils Celebrate Hallowe'en

A Hallowe'en party was given by the girls of Grades VIII, IX and X, assisted by Miss Mann, on Saturday evening. There was a large number present and a very pleasant evening was spent, guessing contests, music and dancing, games and tricks being indulged in. The costumes were gorgeous and very modern in design and execution, the feminine element leaning stoutly to male attire.

### Harness Shop to Move To New Location

F. J. Clapp has purchased the building formerly occupied by the J. C. Robinson grocery, and intends moving his stock of harness, etc., to these premises about Nov. 15th. In addition to the lines formerly carried, Mr. Clapp is adding several new lines to his stock.

### About to Leave Beaver Lumber Co.

Alex Corless is severing his connection with the Beaver Lumber Co.'s business here, and leaving town, and in consequence is offering a quantity of furniture and household effects for sale, a list of which appears elsewhere in this issue. Parties desiring furniture, etc., would do well to look his list over carefully.

Mrs. J. N. Baubier was a visitor in Calgary for some days, motoring home with Mr. Baubier, who is still working in connection with the U.F.A. drive.

### Hallowe'en Party Greatly Enjoyed

Miss Rachel Smith's Hallowe'en party on Friday evening last was the event of the season in the younger set. As the guests were received in the handsomely decorated rooms, the girls were beset with a black cat and the boys with a witch. The evening held no idle moments for the guests, games of various kinds, guessing contests, etc., filling every moment. A tasty lunch was provided which all thoroughly enjoyed. Mrs. Smith was assisted by Mrs. G. J. Ryd during the evening in providing entertainment for the many guests, and when the party broke up about midnight, a happy crowd of young people wended their way homeward, all voting the evening to have been the best in their experience.

### More Light Needed On This Subject.

Sandy McDougall and Tom Gaddes, two of our most eligible young bachelors, are off for Scotland this fall. Interviewed as to his intentions in making the trip, Sandy confided to our representative that he was going along to see that Tom got off on the right foot. Tom, when seen, infers he is going to see that Sandy has the friend in need along. Taken altogether the expedition looks very suspicious from The Chronicle standpoint. How does it look to you, gentle reader?

### Congregation Elects Officers.

A meeting was held after the Church of England service on Oct. 23rd, when Mrs. F. C. Alcock was appointed Sec-Treas., and J. T. Stephenson, warden and sidesman, pro tem. The next service will be held on Sunday, Nov. 7th, in the Union Church at 3 o'clock.

Born—On Sunday, October 31st, to Mr. and Mrs. F. Galoway, a son.

THURSDAY, Nov. 4, 1920.

**BETTER BE SURE**

A Rev. Mr. Jones, of Lethbridge, was told by someone that Hon. J. R. Boyle was interested in an export liquor house in Lethbridge, and with out any enquiry brought the matter before a meeting, from where it naturally found its way into the papers. Mr. Boyle denies there is the slightest ground for the rumor and it is to be hoped for decency's sake, the minister in question will either prove the truth of the rumors he helped circulate or apologize handsomely. A minister of all people should be absolutely sure of his grounds before lending himself to shandorous statements.

**HAS LITTLE REAL BACKING**

The Alberta takes Mr. Boyle to task for admitting that it is impossible to enforce the liquor act. Mr. Boyle knows that a large percentage of supposed prohibition advocates are among those who persistently take advantage of every opportunity to truss the provisions of the liquor act, and that so long as the majority of the people in the country are not in sympathy enough with the legislation in force to act in accord with it, there is little hope of enforcing it.

**WANT RESULTS ANYWAY**

After accepting the issue as presented by Premier Stewart, that if an overwhelming majority was registered in favor of prohibition the importation of liquor into Alberta, that bone dry legislation would be put into force, the prohibitionists of Calgary are now claiming that the legislature should accept the referendum vote as demanding such action. The trouble with this class of people is that they want things their way regardless. There is no attempt to be fair, much less generous to their opponents.

The recent action taken in regard to telephones in arrears has wonderfully improved the promptness with which payment is made.

The completion of the cement crossings recently built by the village council has resulted in much more satisfactory pilgrimages around town by pedestrians.

The Drumheller coal mines are tied up for lack of cars, the mines are idle and the men are leaving the job. Somebody is always taking the field out of life.

Tuesday was not election day in Champion, but if the air on the street could be taken for an indication something was in the air, as the crowd was usually large.

The Calgary Auto Club recommends that anyone under the influence of liquor found driving a car should be fined \$300 and the car impounded. As a drunken auto driver is as dangerous to the public as a mad dog he might be shot at sight with good reasons in the way of public safety.

Canada's three warships, which were presented to the Dominion by the Imperial government to form the nucleus of a Canadian navy, will arrive in Canadian waters shortly before Christmas. Definite word has been received by the department of the naval service from the Captain of the cruiser Aurora, that the Aurora and the destroyer Patriot and Patriote will sail from Plymouth or about Nov. 20th.

Investigation of conditions at Kingston penitentiary, it is claimed, will result in a number of the officials losing their positions, and a number of arrests are promised shortly.

In Chicago the hotel profiteers are being proceeded against and cuts of from one to two dollars in regular dinner prices are being announced. One of these days the fight against high cost meals may reach Calgary, just where there is no limit—Calgary Herald.

A chiropractic doctor at Stettler has been convicted on a charge of manslaughter and sentenced to one month's imprisonment. He failed to diagnose a case of appendicitis and his patient died, presumably for lack of proper treatment. The sentence has been appealed.

**THE SEEING EYE**

Principal Reynolds of the Ontario Agriculture College thus delivers himself in the Agricultural Gazette of Canada:

The teacher who hopes to take a right place in the life of the country school district must cultivate the seeing eye and the understanding heart for persons and things rural. The usual, popular melodrama, comic supplement, moving picture conception of the farmer and of country people must be forgotten. It is essentially and perilously false. The farmer is something of a humorist and takes delight in deceiving the uninitiated by a somewhat unfinished exterior. The city-bred person makes the fatal mistake of judging by outside appearances. To the city trained eye there are two classes of persons, one wearing overalls and the other wearing white collars. The former class work with their hands. The latter class work with their brains. That is the superficial judgment, which ignores the fact that there is a great deal of clear, hard thinking done today by the man wearing overalls. At any rate, the farmer belongs to both classes. The more he understands of those discoveries which is the business of the agricultural college to make, the more he absorbs the teaching which it is the

business of the college to spread abroad, the better farmer will be.

**Farming Deserves More From Govt.**

Hon. McKenzie King expresses the opinion that the government has spent far too little in the encouragement of the basis industry of the country, viz—farming. Out of a total of \$200,000,000 of government expenditure only \$2,000,000 had been spent on agriculture, whereas enormous sums of the public money were spent in ways that were wholly unproductive.

## Our Civilian Soldiers Did Splendid Work As Immigration Agents

The statement has been made that the best immigration agents Canada ever had were her soldiers, and there is a good deal of truth in this. It is inevitable, of course, that in the aftermath of war, the eyes of thousands should be turned to the new fields of endeavor Canada offers them, but it must be admitted that the Canadian army has had a large part in bringing this about, and a part of greater value and benefit in acquainting these intending European settlers with what they are to expect in the Dominion, preparing them for the differences which exist in customs, conditions, and characteristics, a comprehension of which is necessary for successful national assimilation.

Before the war, despite active propaganda, a lamentable ignorance of Canada, her conditions of life and opportunities, existed among the masses of people in the British Isles; while on the Canadian side, there was an equal lack of understanding with England, her people, their characteristics and their country. With the continuous presence of Canadian troops, their intermingling with the people and their daily intercourse, both sides discovered agreeably that there was much to learn of the country of the other and that the cherished ideas of existing differences were largely imaginary.

Discourses on Canada, Canadian life, and its opportunities, were remarkably popular with people who anticipated the upheaval which would attend the aftermath of the war, and

as a result, not only were settlers unconsciously recruited, but unlike pre-war immigrants, set out for a land they had seen and understood. These discourses—largely undisturbed in France and Belgium wonderful tales, none the less alluring because of their veracity, were told in village huts, and Canada became the Mecca of thousands of French and Belgian farmers tilling their tiny pieces of land who dreamt of the big productive areas they could hold in the new land. As a consequence, many of them are coming and they may be classed amongst the finest citizens a country could desire. The war bringing men of all nations and pursuits together gave opportunity to a hitherto unprecedented opportunity of each comparing his own land with that of others, summing up its advantages and making a just appraisal.

Certainly there were never better immigration agents than these civilian soldiers who had left the country they were fighting to find a better life in the Dominion. Canada has been well advertised, and in the best way. Great immigration from the British Isles has since the termination of hostilities, we are told it is showing that the next few years will show that the Dominion is more than adequate to the demand. Not a little of this flood can be attributed to the unconscious advertising of the Canadian soldier, and of all, they come to a home they know, and to people they understand, whose friendship they made in the dark days past.

## Great Enthusiasm Over Sunflower Crop

Large Areas in Alberta Were Sown to Sunflowers This Year.

While the official crop reports contain statistics of record yields of wheat and oats and other cereals, grains in many parts of the province, little has been said this year about Alberta's newest allage—sunflowers. Yet, this crop which has been proved by experiments to be equal, ton for ton, to the best of the older allage crops, while the yield per acre is approximately double, has been cultivated extensively in Alberta this year. The exact acreage planted to this crop is not yet known, but very large areas in various parts of Alberta have been sown to sunflowers this year, and an abundant harvest is now being gathered in.

In every part of the province patches of sunflowers are to be found. These are now being cut and yields of from twenty to thirty-five bushels per acre have been obtained. New also are to be seen everywhere and in another twelve months time, provided farmers are still so enthusiastic about the crop, the total number will be more than doubled.

The Cardston district of Southern Alberta may be taken as an example. Eighty acres have been erected this year, to take care of sunflowers on small areas. So successful has been the crop that the farmers now plan the construction of one hundred more acres in 1921 when the area sown to this crop will be increased from about 50 to 1,000 acres.

## U.S. Millionaires

Census Shows Every 2,100 Is in Million Group.

Approximately 50,000 persons now may classify themselves as members of the "millionaire group." The Federal income tax returns indicate, says the New York Herald.

The group, as unofficially computed here, includes the members of the families of 20,000 persons who in their return of income show an income of at least \$50,000 in 1919. This is the lowest probable return on \$1,000,000 invested. This definition is a group of course would include many high salaried executives. Some of these no doubt could show a capital wealth of \$1,000,000.

War profits, however, are known to have increased considerably the millionaire group. In 1917, it numbered only slightly more than 16,000. Returns showing income of \$50,000 to \$75,000 a year were filed by 15,917 heads of families, while 14,000 confessed to annual incomes ranging from \$75,000 to \$1,000,000. Persons with incomes of more than \$1,000,000 in 1919 return are said to have increased to at least 162 from 141.

More than 4,000,000 heads of families have been included in the returns to preliminary estimates of Internal Revenue Bureau officials. At least one-half are believed to represent families whose annual income was \$2,000 or less.

With a population estimated at 105,000,000, the United States now has a "millionaire group" numbering one in each 2,100.

## Result of Red Regime.

The revolution has developed a new and aggressive type of woman among the Russians. Most of them wear military uniforms and have their hair cut short. The socialization of women has been carried out only in the remote parts of the country. In the larger cities they still form marriage ties, but are at the same time otherwise free to live their own lives. As an example, Lenin's wife is Comrade Erusapaka. A thousand of these women are actively fighting the Poles, and three thousand have been mobilized for the defense of Petrograd.

## Canada's Wheat Yield.

The Dominion Bureau of Statistics estimates Canada's total wheat yield at 262,382,000 bushels, as compared with the final estimate of 193,600,000 bushels. The total oats yield is placed at 496,666,000 bushels, as compared with 494,387,000 bushels last year, and the barley yield is estimated at 63,385,500 bushels, against 56,389,400 bushels in 1919. For 1920, the Dominion's forecast is 238,617,000 bushels of wheat, 318,250,000 bushels of oats, 40,337,000 bushels of barley, 10,190,000 bushels of flax and 10,190,000 bushels of clover production will reach 12,853,900 tons from 10,409,150 acres.

## Saskatchewan Secures Settlers.

Saskatchewan received 355 out of the 1,547 immigrants from the United States who entered Canada during July last. The Saskatchewan government has a special lady commissioner overseas securing domestic help for the province.

## Special Feed for Moulting Fowls

Sunflower Seeds Recommended For High Percentage of Oil.

Feeding experiments with moulting fowls, in which the birds are allowed to select their own ration, show that their natural appetite is not for a nitrogenous ration, as is commonly believed to be the case, but for one comparatively high in fatness and oil. This preference apparently is based upon the fact that while the fowl is growing its new coat of feathers it needs an extra amount of oil and the practical poultry feeder will see that the supply of this is ample. There is little danger of moulting birds becoming overfat for that reason it is safe to feed corn in as large proportion as the fowls care for. In the case of fowls moulting late in the fall, after cold weather sets in, it is probable that the preference for fat or oil in the ration is due in part to the need for extra fuel with which to keep the body warm, but even in warm weather the preference of the moulting hen for fat in the ration is undoubtedly correct.

Sunflower seeds, which are quite highly recommended for feeding to fowls at this season, offer their special value to the high percentage of oil which they contain and if they can be secured at a reasonable price are a desirable addition to the ration. In fact, the fowls are regarded as especially desirable feed during the moulting season, partly because of the oil it contains, but more perhaps because of the fact that it is of a cooling nature and helps to keep the bowels functioning naturally. About 10 per cent, may safely be added to the ration. One may use as much as 30 per cent. of oil meal in the mash with no noticeable ill results, but there is no practical advantage in feeding it so heavily.

## Captain Fryatt's Ship Sold at Auction

Sum Derived From Sale Used For Charitable Purpose.

Capt. Fryatt's ship, the "Brussels," has been sold at auction at the Baltic Shipping Exchange in London for \$15,000. Many ship owners attended the sale, but the highest bid for the ship was not spirited. Sir Ernest Glover, representing the Ministry of Shipping, attended the sale, and a request had been received from the Belgian Government that a portion of the Brussels should be sold to them. The ship, which was built in Belgium, was erected in Zebrugue. The Government, it was announced, will apply the proceeds of the sale in a memorial to Brussels to some charitable purpose connected with Capt. Fryatt's name.

## The "Ad" Man in Japan.

Japanese advertisers believe in a lavish use of smiles. "The paper we sell," runs the announcement in a Tokio stationer's shop, "is as solid as the hide of an elephant." "Stop inside" is the invocation of a big multiple shop in the same city. "You are welcomed as fondly as a ray of sunshine after a rainy day. Each one of our assistants is as amiable as a father seeking a husband for a doleful daughter. Goods are despatched to customers' houses with the rapidity of a shot from the cannon's mouth. A grocer proclaims that his "superfine vinegar is more acid than the tongue of the most fendsmith mother-in-law."

## 400 Miles by Canoe

Winning Men Return From Long Trip Through North. Four hundred miles by canoe in the wilds of Northern Manitoba has been the experience of two Winnipeg men, R. F. McWilliams and Prof. R. C. Wallace, commissioner of Northern Manitoba, who returned recently from a canoe trip. The trip started at Norway House and the route down the Hayes River was that taken by the Schlick settlers. Two Indians piloted the canoe.

## Pulp Resources of Manitoba.

Pulp resources in Northern Manitoba will constitute a large part of the province's supply according to the inspector of Dominion forest reserves who recently made a survey. He reports that a good quality of pulp is found which would make excellent pulp, but there is no outlet at the present time for the finished product.

Over 6,000,000 acres of land are under tobacco cultivation throughout the world.

## Remarkable Growth Of British Columbia Salmon Fisheries

In every part of the civilized world which man has brought under his thrall, and in the very regions he is exploring and adding to the earth's area of utilitarian value, one will find the ubiquitous salmon, and it is safe to say that the majority of these fish will be found to bear the name of some locality on the Canadian Pacific coast. In this era of can and cold storage, methods are devised for preserving most edible commodities and to British Columbia belongs the salmon.

British Columbia leads the Dominion in the value of her fisheries, according to 1919 for \$15,216,397 of the net revenue of \$31,348,034. More than two-thirds of this fish value is derived from the salmon catch which is valued at \$10,919,959, and is easily the most important fish in catch and value in the Dominion's fisheries. The salmon fishing industry is to-day a strong asset in Dominion revenue and the first activity of the Pacific coast, and is, incidentally, the largest fishing enterprise in the world. In a history of more than 50 years of development, it has seen many fluctuations and depressions, and has emerged successfully as an important prime importance, capable of yet greater expansion with further development.

The first catching of Pacific salmon was on the Fraser River in 1863 when a few cases were put up at New Westminster by a Mr. Annadale. Though his efforts were on a very small scale the enterprise was sufficient to convince him there was a profitable field in the industry. The following winter he started a small business and persuaded Mr. Alexander Ewen to come to British Columbia and engage in the industry. In 1864 they arrived and from that time the salmon industry of British Columbia has been a recognized leader in the industry of British Columbia.

The first pioneer of the industry in the province was William Hume who, after engaging in the business on the Sacramento River in California, transferred his activities to the Columbia River in British Columbia in 1891.

## Daylight After Dark

Can Have Any Shade Desired By Turning Switch.

From London comes the announcement of the Daylight Reflector for use with artificial light. With it you can have daylight after dark. You can have moon sunlight, north skylight or any shade of daylight you desire in the wee wee hours by just turning a switch. It is no idle boast. It is already an accomplished fact backed up by the Illuminating Engineers' Society and the leading electrical and technical societies of Great Britain. After decades of experimenting and investigation by electrical and scientific experts it remains to be seen a portrait artist, Mr. George Sherringham, of London, by applying a few dials of color to an electric reflector to reveal the elusive secret.

Mr. Sherringham, during the dull days of winter, found that colors mixed by artificial light differed from those he mixed by daylight. Moreover, unfinished color work begun during daylight could not be continued under artificial light, because the proportions of colors that make up the spectrum from whence we get our daylight changed materially when artificial light was turned on. Naturally, Mr. Sherringham's colors looked altogether different. It was evident therefore, that a radical change had changed their proportions. So Mr. Sherringham began experimenting with colors of the spectrum, i.e., red, orange, yellow, green, blue, violet on the electric light reflectors, and in time he found the right proportions and produced daylight after dark.

## Four Hundred Bushels From Seven Acres.

Yields in the irrigated district at Coaldale, Alberta, are showing quite a spread. Some farmers will not get twenty bushels to the acre while others, O. O. Petersen, to the acre have thrashed more than four hundred bushels of seven acres. His farm is in the Redhead area, about a mile from the Hudson Bay. Mr. Petersen will get more than thirty bushels to the acre, and L. P. Baldwin, whose farm is also irrigated is averaging No. 1.

## Interesting Outside Capital.

The sodium phosphate deposits of Saskatchewan are receiving considerable attention in the central part, and in the south the Milk River enters the province and after flowing through Canadian territory for a considerable distance re-enters United States territory and flows into the Missouri River. The water of the southern drainage basin of Alberta, therefore, enters the Gulf of Mexico.

1866, on learning that the fish were more plentiful there and the season longer. As he had pioneered the industry, so he pioneered the fishery on the Columbia and lived to see the pack there increase from 4,000 cases the first season to 65,000 cases in 1918, which is about the harvest year.

By 1883, the first season of canneries operating on the Columbia had increased to 39, but just as was the supply it was unequal to the demands made up in. After 1884, a decline set in, and by 1900 the number of plants had diminished. Since that time it has been necessary to resort to artificial propagation of salmon in the Columbia and its tributaries.

Commercial canning on the Fraser River in 1876 was represented by three plants and the combined pack was 9,847 cases. By 1901 the number of canneries had increased to 48, to which must be added 25 operating on the American side, in all 73 drawing their supply from the one stream. The principal employment in a vast area of the sockeye variety and in the pinnacle year of the industry, 2,400,000 cases of 48 lbs. were packed. This and 343 canned 39 from 2,000 a year, the world's production of canned salmon that year.

The year 1917 saw the commencement of canning operations on the Skeena River, on Puget Sound, and on other streams. On Skeena River the principal employment in a vast area of the sockeye variety and in the pinnacle year of the industry, 2,400,000 cases of 48 lbs. were packed. This and 343 canned 39 from 2,000 a year, the world's production of canned salmon that year.

This and 343 canned 39 from 2,000 a year, the world's production of canned salmon that year.

## To Connect Islands of Japan

Tunnel Six Miles Long Will Be Completed in 1929.

A project for connecting Nippon, the main island of the Japanese group, with the neighboring island of Kyushu by means of a tunnel starting at Shimonoeki was originated by a Japanese shipping magnate, but has been taken over by the government, and is now being given out many details.

It is understood, however, that borings have been made in the sea bed by means of a tunnel, and in order to reduce the angle of inclination, the descent of the tunnel will commence about a mile from the coast, and at first run under the narrow channel between the mainland and the little island of Hikoisaka, on which an underground station will probably be built. From there it will run under the actual Strait of Shimonoeki as far as the Daiti district a few miles to the west of Moji, where it will join the Kyushu railway. It is estimated that the construction of the tunnel, which will be six miles in length, will cost 12 to 14 million dollars and will be completed in 1929.

## Four Hundred Bushels From Seven Acres.

Yields in the irrigated district at Coaldale, Alberta, are showing quite a spread. Some farmers will not get twenty bushels to the acre while others, O. O. Petersen, to the acre have thrashed more than four hundred bushels of seven acres. His farm is in the Redhead area, about a mile from the Hudson Bay. Mr. Petersen will get more than thirty bushels to the acre, and L. P. Baldwin, whose farm is also irrigated is averaging No. 1.

## Interesting Outside Capital.

The water of the southern drainage basin of Alberta, therefore, enters the Gulf of Mexico.

## Threshing Returns Uniformly Good

In Manitoba Considerable Fall Plowing Has Been Done.

Throughout Central Saskatchewan and Alberta threshing operations have been going on with little interruption for the past fortnight and in several districts over fifty per cent. of the grain is now in the granaries.

In the 30 miles of territory between North Battleford and Stony Plains, west of Edmonton, from Edmonton to Calgary and Edmonton to Regina, and Alliance, and from Hanna to Roseburg, threshing returns show the crops to be uniformly good, wheat running from 20 to 40 bushels an acre and oats 60 to 70, while flax is yielding 12 to 20 bushels per acre. In the Red River valley of Manitoba, farmers turned their attention to fall plowing as soon as they got their threshing done, and in some localities fifty per cent. of this work has already been done. Markets for grain is being deferred in order that this important work shall not be interfered with.

In Southern and Southwestern Manitoba good progress has been made with threshing, there having been little delay on account of the weather. All crops are doing well as a general rule. In Central Manitoba frequent showers have occurred since cutting and threshing has been considerably interfered with in some sections, but wherever it is possible the farmers are making their men and outfits into the fields to plow. In this extensive grain growing section all grains are turning out well, wheat yields running from 15 to 40 bushels per acre.

## Asbestos Long in Use.

The silky fibre derived from certain rocks which we call asbestos is as familiar to the ancient Greeks and Romans, and was commonly used by them to make fireproof yarn, fireproof rope and fireproof cloth. These are the uses to which asbestos is chiefly put at the present time. It is only in the production of the modern material that it has been improved upon the ancients. It is now spun so fine that a pound of asbestos will yield two-thirds of a mile of thread. To "wash" a piece of asbestos cloth one has only to put it into fire. That cleans it.

## Live Hog Industry Shows Heavy Loss.

The live hog industry of Canada suffered loss of approximately \$11,000,000 during the seven months ending July 31. The sum represents the difference in value between the visible hog marketings during that period and the same period of 1919. The loss in revenue is attributed to the liquidation of breeding stock during 1919.

# AUCTION SALE!

Having received instructions from L. W. Boden, who is discontinuing farming, I will sell by auction, at his farm, the N. E. Section 34-15-22, 4½ miles North, and 8½ miles East of Champion; 4 miles South and 3½ miles East of Reid Hill, on

## TUESDAY, NOVEMBER 16th, 1920

Commencing 11 o'clock, sharp, the following:

### Twenty-Eight Head Horses!

- |                                 |                                  |
|---------------------------------|----------------------------------|
| 1 Brown Mare, age 7, 1,600 lbs. | 1 Bay Gelding, age 7, 1,600 lbs. |
| 1 Bay Mare, age 12, 1,400 lbs.  | 1 Brown Gelding, age 5, 1,600.   |
| 1 Gray Mare, age 8, 1,500 lbs.  | 1 Black Gelding, age 5, 1,600.   |
| 1 Bay Mare, age 6, 1,500 lbs.   | 1 Black Gelding, age 15, 1,300.  |
| 1 Black Mare, age 5, 1,500 lbs. | 1 Black Gelding, age 4, 1,400.   |
| 1 Bay Mare, age 6, 1,200 lbs.   | 1 Black Mare, age 4, 1,500 lbs.  |

#### COLTS

- 4 Colts, three years old.
- 5 Colts, two years old.
- 3 Colts, one year old.
- 4 Sucking Colts.

### 14 Head Cattle, 11 Hogs, Poultry, Etc.

## COAL!

The Thierault Mine is now in  
operation and can supply coal  
in any quantity.

Place your order for delivery  
in town. Arrangements are  
under way to deliver after Oct. 1.

Our Coal is the Best and  
Cleanest on the market.

Try a Load and be Convinced.  
**GEO. RHODES, Operator.**

## Local & General

Note the auction sales  
advertised in this issue.

Mrs. G. T. Stoddard was a  
visitor to Lethbridge during  
the week.

Mrs. T. J. McLeod, of Bassano,  
is on a visit to her parents, Mr.  
and Mrs. R. M. Long.

Fred Smith left for the  
week to attend the provincial  
School of Agriculture at Clares-  
holm.

Mrs. W. E. Watkins and  
daughters returned recently  
from coast points, where they  
had been on a vacation.

Guy Standish left for Spokane  
on Saturday morning's train,  
where he will spend the winter,  
joining Mrs. Standish.

H. Bradfield was a Calgary  
visitor over the week-end,  
securing dental attention and  
taking in Chu Chin Chow.

James and Lewis Groves left  
recently for Claresholm, where  
they will continue their course  
at the school of Agriculture.

Mr. and Mrs. Porter, of  
Claresholm, were the guests of  
Mrs. J. Harper over the week-  
end. They made the trip by  
motor car.

Joseph Myers, of Kirkcaldy,  
was in town on Monday  
renewing old acquaintances.  
He is leaving in the near future  
for the coast.

Tennis is still a popular game  
here, and racquets and other  
tennis paraphernalia are as  
much in evidence as in the  
summer months.

The wheat "strike" is spread-  
ing in the United States, Texas  
and Iowa farmers joining their  
Kansas brethren in holding  
their wheat for three dollars a  
bushel.

Chicago barbers are raising  
the price of a haircut to \$1.00,  
and shaves to 35 cents, while  
at Los Angeles the price of 15  
cents for a shave has made its  
appearance.

The discovery of a still in the  
Fornio jail would indicate that  
some long-headed individual  
was incarcerated there at that  
time. It is certainly the last  
place to look for an illicit still.

Mr. and Mrs. W. K. Anderson  
spent the week-end in Calgary,  
taking in the performance of  
Chu Chin Chow. They were  
accompanied by Dr. and Mrs.  
McLean, of Carmangay.

Premier Meighen will speak  
in Lethbridge on Nov. 8th.  
This will be the best opportu-  
nity to hear the apostle of  
protection that will be afforded  
the people of this vicinity for  
some time to come.

The Carmangay Sun, in the  
hands of the new publisher,  
Mr. James Mewhort, is a  
decidedly creditable publication  
and well worthy of the hearty  
support of the community in  
which it is published.

Farmers will receive eighteen  
cents more on the wheat  
participation certificates which  
will make a total of \$2.50 per  
bushel for the wheat sold in  
the prairie provinces. Pity the  
conditions did not prevail this  
year.

The Golden Rule Women's  
Institute will hold a whist  
drive and dance in the Piro-  
gard school house Wednesday  
evening November 10th. Prizes  
will be awarded the winners.  
Admission 35 cents. Everyone  
welcome.

L. W. Boden, who has rented  
his farm, and is leaving for  
coast points in the near future  
is offering his farm stock  
implements and household  
effects for sale by public  
auction on Tuesday, Nov. 10th,  
with Clarence Davis in charge.  
Note the announcement in this  
issue with reference to this  
sale.

Born.—On Monday, Novem-  
ber 1st, to Mr. and Mrs. Bert  
Grundle, a son.

Roy Lock leaves shortly to  
join Mrs. Lock at Newport,  
Wash., where they will spend  
the winter.

Found.—On road leading  
north of Champron, nonskid  
chain for car. Owner apply at  
telephone office.

Forty-two R.N.W.M.P. horses  
were lost when the old winter  
fair building was destroyed by  
fire at Brandon recently.

W. C. Fry has sold his farm-  
ing outfit, complete, to Louis  
Warren, and rented him his  
farm. Mr. Fry will spend the  
winter at coast point.

Mrs. L. E. Johnson has re-  
opened her boarding house at  
the east end. No further use  
for the boys to get married  
now that they can board at  
home.

The long dry spell may be  
said to have been broken on  
Thursday last, when there was  
considerable precipitation of  
moisture between rain and  
snow. It is hoped it will be  
some time before a dry spell  
of such length is repeated.

Hallowe'en night was duly  
observed by the youth of  
Champron and some of their  
elders. The usual pranks were  
indulged in and as far as can be  
learned not more than the  
usual amount of trouble caused  
for the quieter householders.

Farmers in northern Nebras-  
ka are said to be considering  
the burning of corn instead of  
coal for fuel this winter. Coal  
is \$15 per ton, for the cheapest  
soft variety, and corn is the  
same price. It is claimed a ton  
of corn will give more heat than  
the same weight of coal.

Unfortunately the oil well at  
Czar turns out to be a mistake.  
Most oil wells have the same  
habit, and it would appear  
there is no hope for cheaper  
oil and gasoline for some time  
to come, unless the grip of the  
Standard Oil people can be  
loosened somehow.

The annual meeting of the  
Grain Grower's Co., Champron  
Local will be held in Marks  
Hall on Saturday, November  
6th, at three o'clock in the  
afternoon. Business to elect  
a delegate to general annual  
meeting, to be held in Calgary,  
on Nov. 25th.

F. R. Shepard, formerly of  
Champron but now of Iola,  
northwest of Lacrosse, was a  
visitor here during the week-  
end. Mr. Shepard is now a farmer,  
and pride in his new calling  
shows all over him. He says  
the season has been a success  
ful one in the district in which  
he lives.

A. Bunting, an old-time  
elevator man here, is handling  
the Western Canada Flour  
Mills elevator during the  
illness of G. A. Mathard. Mr.  
Bunting was in charge of the  
National elevator last year,  
leaving here when the crop  
failed.

C. H. Sutton's auction sale on  
Tuesday, November 9th, is  
attracting an unusual amount  
of attention. As Mr. Sutton  
has disposed of his land and is  
leaving the district, all the big  
list of live stock, etc., must be  
disposed of. Make it a point  
to take in this big selling  
event. Clarence Davis will be  
the auctioneer.

Shortage of the wheat crop  
and increased export demand  
will inevitably raise the price  
of wheat, is the opinion of J. S.  
Howard, president of the  
American Farm Bureau Federa-  
tion, an organization repre-  
senting a million and a half  
farmers throughout the United  
States. He based this state-  
ment upon personal investi-  
gation of conditions and the  
best information from market  
exports.

Geo. Harper spent part of the  
week on a hunting trip, visiting  
the vicinity of Claresholm.

B. F. Matlock, formerly of  
Lomond, has moved with his  
family to the Champron dist-  
rict.

John A. Long and Miss Ethel  
motored to Calgary and Bragg  
Creek on Saturday, returning  
Monday.

Clarence Davis returned  
from Bindloss, near Empress,  
Alta., where he had been con-  
ducting an auction sale for Jas.  
Beatty. Good prices were  
realized on all the stock and  
other farm effects offered, and  
about seventy per cent. of the  
proceeds were in cash, although  
the terms allowed credit on  
most of the purchases.

Enrollment of school for the month 119.

Average attendance 102.84.

### Additional Locals.

F. L. Roberts has rented his farm to George Main, and will spend the winter at coast points.

Mr. and Mrs. C. E. Anderson, who have been in Calgary for quite an extended visit, returned home on Monday.

T. M. Moorehouse left for Calgary on Tuesday night to take in the Chin Chow performance.

Mrs. G. F. Smith cut her hand severely last Friday and has had a decidedly unpleasant experience since with it.

J. F. Cassidy left this week for Canora, Sask., where he may take up a drug business for which there is an opening.

The blacksmiths of the province have decided to do a strictly cash business beginning on Nov. 15th. This step has been found necessary as a matter of self protection as the extensive credits given in the past threatened to wreck the blacksmiths.

On November 20th, Champion is to be favored with a visit from Prof. Frank Touche the great recitator and impersonator. His recital will be given in the Union Church under the auspices of the Ladies' Aid. All who wish to spend a profitable and enjoyable evening should make an effort to hear him.

A recent order made by the Canadian National Railways that any employee taking part in politics automatically severs his connection with the railway is being extended, however in spite of the protest, to embrace all government lines.

### Mrs. Fry Entertains To Afternoon Tea

Mrs. W. Fry was the hostess at afternoon tea on Thursday and Friday of last week. There were present on Thursday, Oct. 28th: Mesdames Anderson, Corless, Baker, Collins, Hyndman, Hammet, Kydd, Bradfield, Campbell, Hoskins, Orr, Ezece, Voisey and Pellar. Mrs. Fry was assisted by Mrs. Pellar.

On Friday Mrs. Fry was assisted by Mrs. Roberts and Mesdames Meyer, Moffatt, Oliver, Starr, McLean, Roberts, Robinson, Taylor, Williamson, Woodhull, Jacobson and Schultz were present.

### CHURCH BULLETIN

On Sunday, Nov. 7th, the Rev. J. W. Oliver will be assisted by Rev. George Wood. Old and special services will be conducted at the following places:

### Champion Consolidated School District No. 40.

### Tenders Wanted

Tenders will be received by the undersigned, up to Wednesday, November 10th, for providing hot lunch for country pupils at the schoolhouse at noon. Particulars will be furnished on application. C. C. Hoskins, Chairman Board of Trustees.

Blusson school 11 a.m.  
Anderson school 2:30 p.m.  
Champion 7:30.

Rev. George Wood is a very able speaker and comes to the people of Champion with a real live message, so don't fail to hear him.

Choir practice Wednesday evening at 8:30 p.m.

On Friday night at 7:30 a great social evening will be given in the church by the boys and girls' clubs. A light lunch will be served and games indulged in. All the boys and girls of the community are cordially invited to come and spend a pleasant evening.

Sunday School will be held as usual on Sunday morning at 11 a.m.

C. H. Sutton is selling his live stock, implements and household effects by auction on Tuesday, November 9th, Clarence Davis wielding the hammer. As will be seen by reference to an advertisement elsewhere in this issue, this is one of the biggest events in the sale line that has happened in this vicinity for some time. The offerings are so inclusive of everything needed on a farm that anyone needing anything for the farm could scarcely fail to find what they are looking for included in the list of farm effects. The sale starts at 10 o'clock, sharp, and lunch will be served at noon.

### CHRONICLE "WANT" ADVERTISEMENTS
